

Vacuum easily with Motion Control System™

For a controlled, seamless transition between rooms, the Motion Control System™ allows for stable movements, smooth turning and dynamic traction.

Product Benefits & Features
Turbo Cyclonic Technology™ for better cleaning results

For better cleaning results, the Turbo cyclonic Technology™ improves suction for greater dust pick up. For easier emptying, it also separates the dust from the air and forces it to the sides of the dust bin.

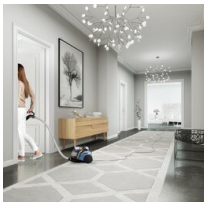

- Compact design
- Integrated parking slots
- Multiple storage positions
- Motion Control system
- Controlled lid on dust bin
- AeroPro aluminium telescopic Tube
- Soft wheels
- 1600 watt
- FlexPro Performance system
- AeroPro aluminium telescopic tube
- 3-in-1 tool
- Excellent dust management
- Manual power regulation
- AeroPro Ergo handle
- Multi room system
- Turbo Cyclonic technology
- Flex Pro™ nozzle for efficient hard-floor cleaning
- 3-in-1 caddy with hose clip

Vacuum easily with Motion Control System™

For a controlled, seamless transition between rooms, the Motion Control System™ allows for stable movements, smooth turning and dynamic traction.

Multi-Room Cleaning System

UltraFlex™ has an extended cleaning reach of 12 meters to allow you to clean large areas without having to change power points.

Easy empty dustbin for great dust management

Completely empty the dust bin and avoid contact with the dust and dirt. For easy dust management there's a lid placed at the bottom of the slim dust bin, so you can control the emptying to reduce dust flying around.

Compact & lightweight for easy and convenient storing

With its compact design and versatile storage options you can fit the UltraFlex into a 40cm wide cupboard space. To suit your available space, store it flat or upright and detach the hose if necessary.

Product Specification

Cord Length	9
Type of handle	2 front +1 top
Dimensions_BatteryPortableVacs	xx
Dust container capacity	1.6
Color	Steel Blue Metallic
