

Delicious coffee at home

Experience the great taste of filter coffee with the Explore 7 Coffee Maker, and its automatic pour-over technology. For ECBC-certified brewing in the comfort of your home. With its sleek lines and contemporary design, it will complement any kitchen – the perfect blend of style and substance.

Product Benefits & Features

Perfect coffee in every cup with certified brewing

Wake up to better taste with the Explore 7 Coffee Maker. It meets the European Coffee Brewing Centre quality standards, such as making a full pot in just six minutes and brewing the coffee between 92°C and 96°C. Trust us to supply delicious flavours, every time.

A wider showerhead for better coffee

The AutoBloom™ showerhead is designed to be wider than the standard size*. With an automatic pour over technology, the water evenly soaks large quantities of coffee. Guaranteeing consistent strength in each brew. (*In comparison with the Electrolux Expressionist coffee maker, EKF7800.)

Aroma selector for extra flavour

Activate the aroma selector for an extra punch of flavour. The same quality coffee, just with a stronger taste.

Consistent taste with our carafe and mixing lid

Make consistently great-tasting coffee using our carafe with specialised mixing lid. As coffee is poured into the carafe, aromas are gently mixed together for a well-rounded taste. So each sip is as delicious as the last.

Easy fill-in water tank and sliding filter

The Explore 7 Coffee Maker's filter conveniently slides to the side for quick and easy handling, and the water tank can be refilled in a flash. For hassle-free coffee, every morning.

Product Specification

Color	Black
Jug	Glass with metal ring
Water level indicator	Yes
Water container	Yes
Power W	1500
Net Weight	2.4
